

Overbath Stretcher

Pre Installation checksheet

Wall Specification

The changing table should be fixed to a load bearing wall (ie. strong enough to carry a 100kg load on wall fixing) which is flat and free from obstruction from 700mm to 1800mm above the floor. If the changing table must be mounted on a stud wall, the wall will need special reinforcement. Either noggins should be placed in the wall as shown above or 25mm (1 inch) marine or exterior plywood should be used to cover the entire fixing area.

We understand that any waiting time will be charged to us and should the site require a second visit due to the above requirements not being met an additional £350.00 per visit will be charged and we agree to pay those charges.
